### WE ARE UF EWB PERU

Engineers Without Borders - USA allows engineers and aspiring engineering students around the country to use their education and skills in engineering design to provide humanitarian aid to communities around the world as well as gain professional educational opportunities for its members.

We are the University of Florida's chapter of Engineers Without Borders Peru Team. We are currently in a five-year partnership with the community of Maras Ayllu. Maras Ayllu is a small town in the Sacred Valley of the Incas, a fertile region of great historic, cultural, and economic significance. The farming community and tourism industry help to drive the local economy. The community is currently facing both water storage and water quality issues which we will be assessing throughout our partnership.
